

PSC

Engineering & Contracting

PSC S.R.L. ENGINEERING & CONTRACTING

PSC Srl Engineering & Contracting is a worldwide known and appreciated contractor in EPCM (Engineering, Procurement and Construction Management) projects, operating in several markets, with an imperative commitment to quality.

The company is characterized by the utmost professionalism of its personnel and the resolute attitude to excellence. Since 1989 PSC has been an engineering partner to EPC Contractors and End Users all over the world.

PSC's structure is multidisciplinary, organized in four divisions:

WATER AND WASTEWATER TREATMENT PLANTS

**AUTOMATION CONTROL SYSTEM
& ELECTRICAL DISTRIBUTION SYSTEM (LV/MV)**

ADVANCED ENGINEERING SERVICES

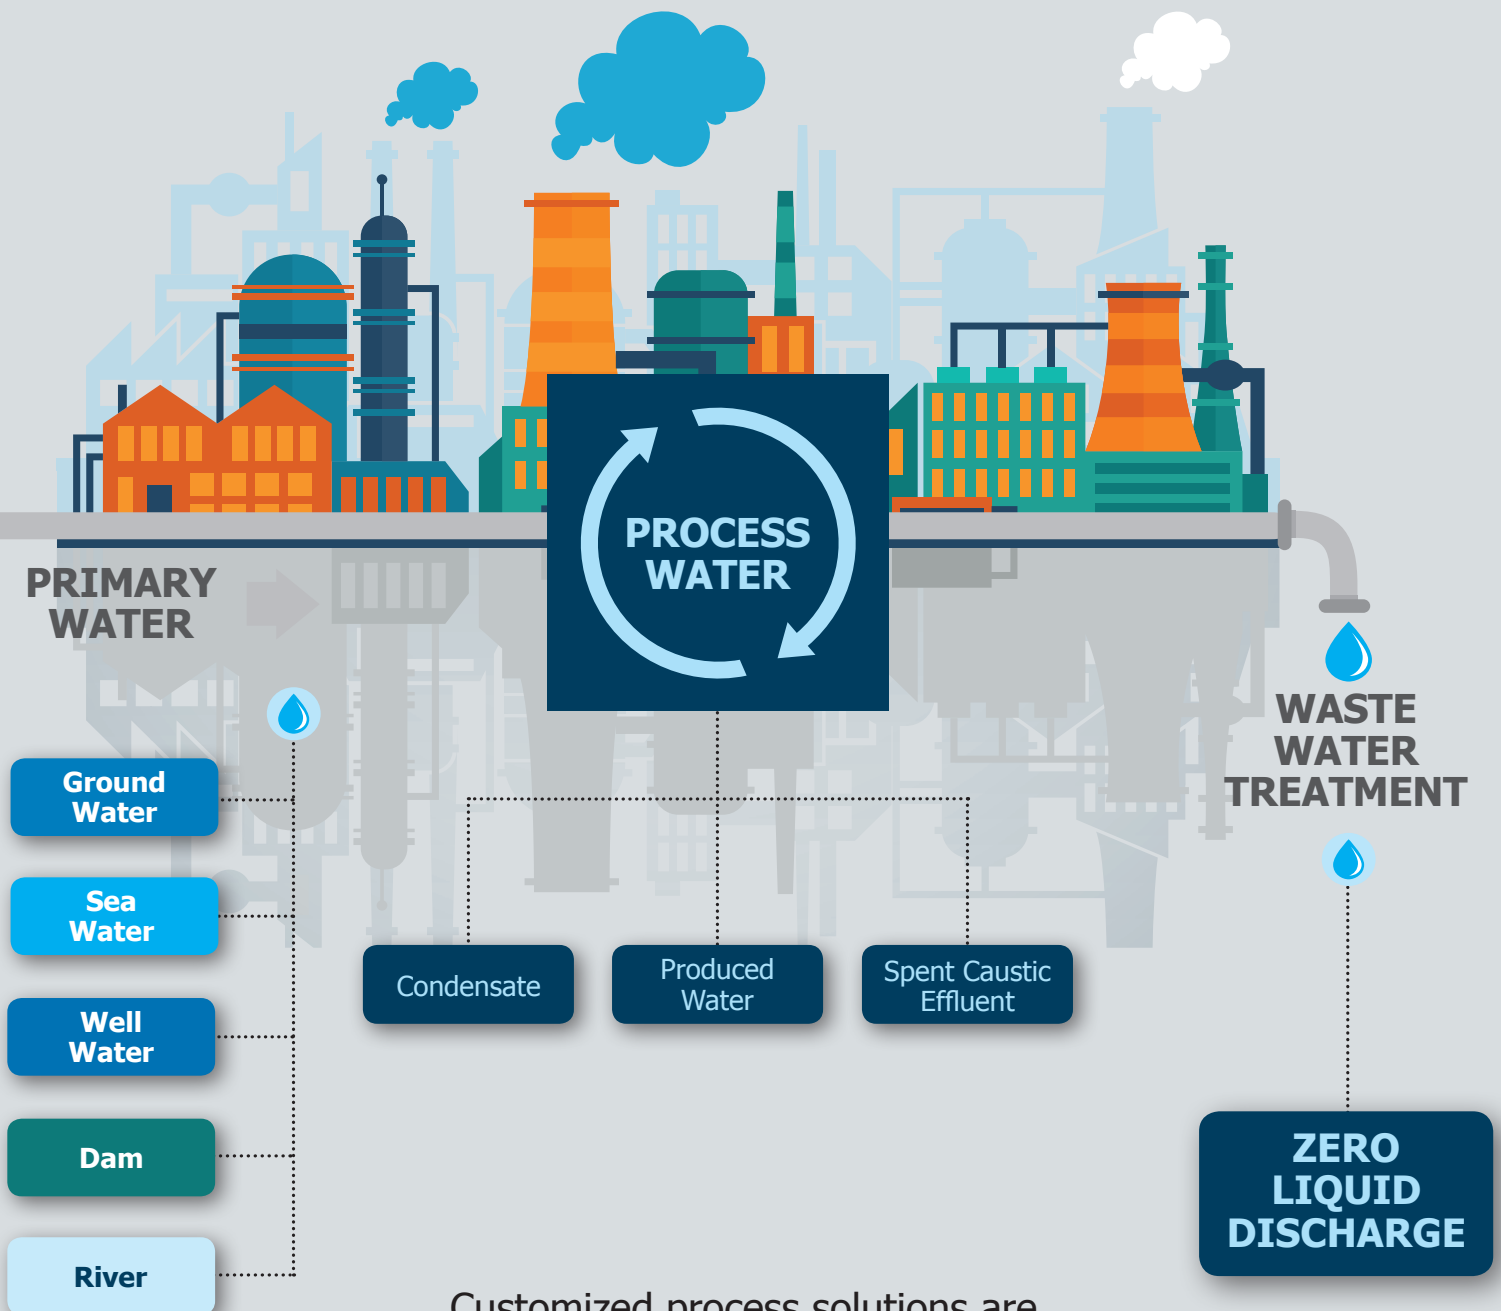

PROCESS ENGINEERING AND SPECIAL PROCESS PACKAGES

PSC is proud to assert that during the years, the respect for commitment and the loyalty to the undertaking, has created trustful and durable relationships with clients, partners and subvendors, realizing a positive and friendly climate to express its potential.

CABLE TRAYS
TO ELEV.3000

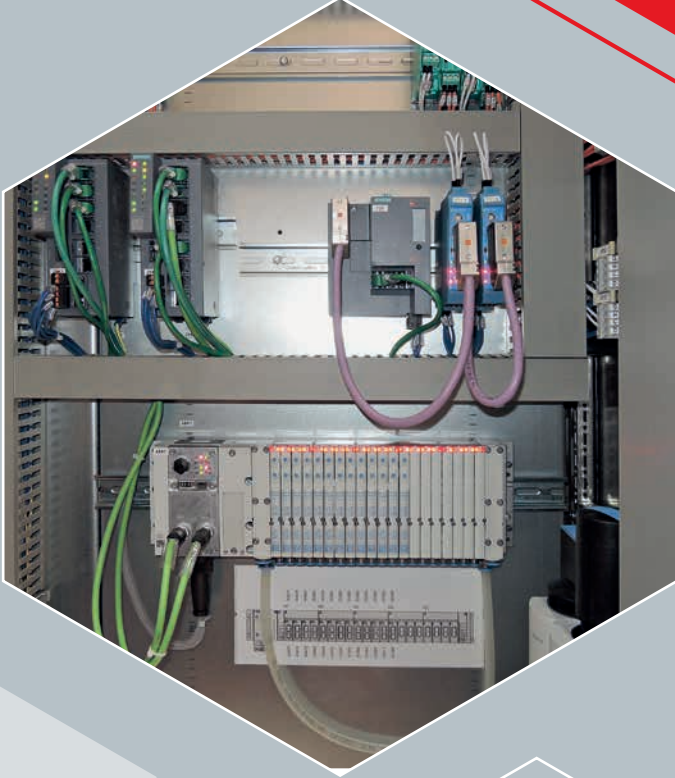

Y=61400

WATER

Customized process solutions are designed for all waters involved in the industrial facility: **Primary Waters, Process Waters, Waste Waters.**

AUTOMATION

PAC - PROGRAMMABLE AUTOMATION CONTROLLER

Modular controllers for the management of industrial machines and processes, from small PLCs to plant-wide DCS.

FIELDBUS & INDUSTRIAL ETHERNET

Components for real-time communication in the industrial environment.

I/O MODULES

Expandable modules of different fields signals.

HMI - HUMAN MACHINE INTERFACE

User interfaces for smart information management, from small local operator panels to full-integrated PC based control rooms.

UL certification
for Industrial
Control Panels.

SOFTWARE

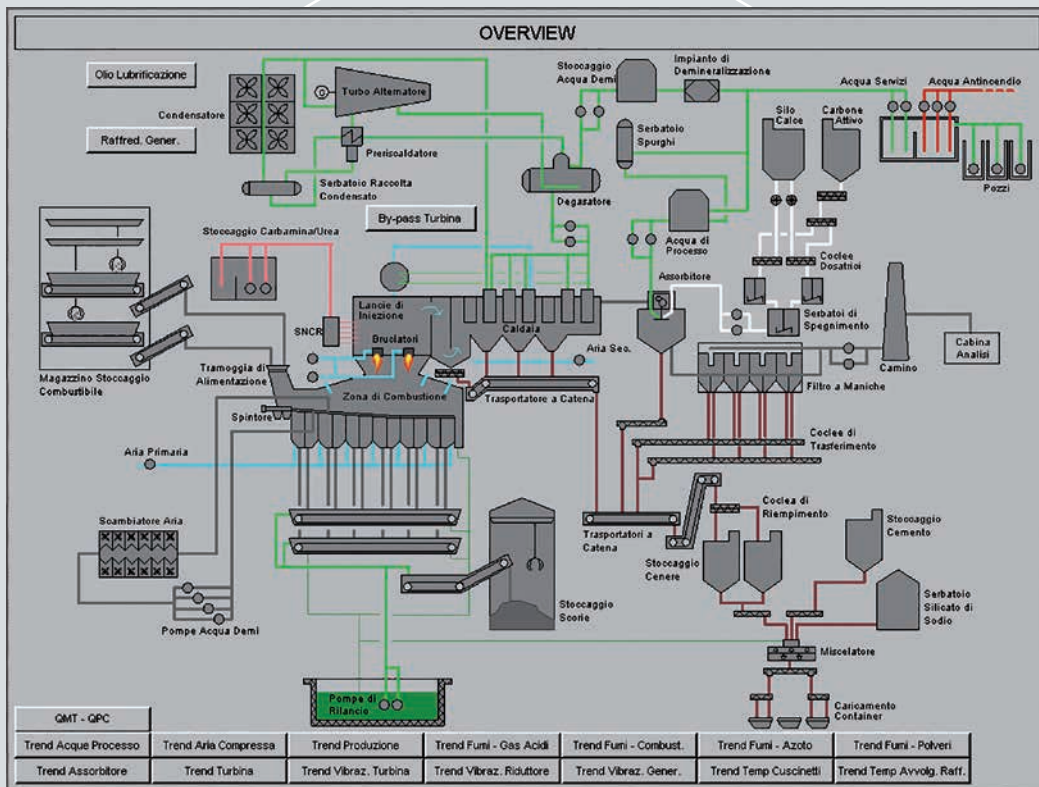

A complete range to support every need for control, management and interface.

LV/MV PANELS

Distribution Panels complete the range of products related to the Automation Control Systems. Inserted as a natural evolution of the automation panels to provide a complete and fully integrated solution. From hybrid PLC/MSC panels to dedicated LV /MV panel.

ENGINEERING AND TECHNICAL SERVICES

Engineering activities
basic and detailed process,
civil, mechanical, electrical,
instrumentation and automation.

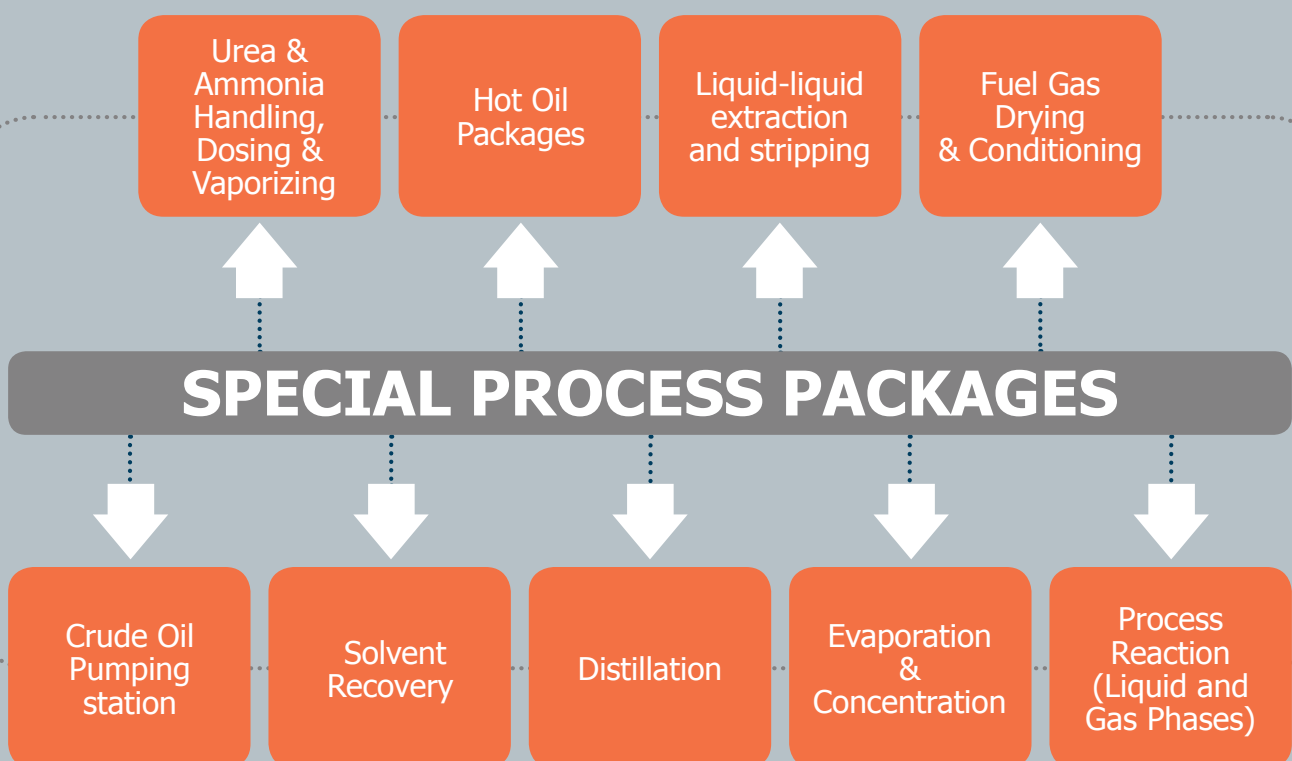

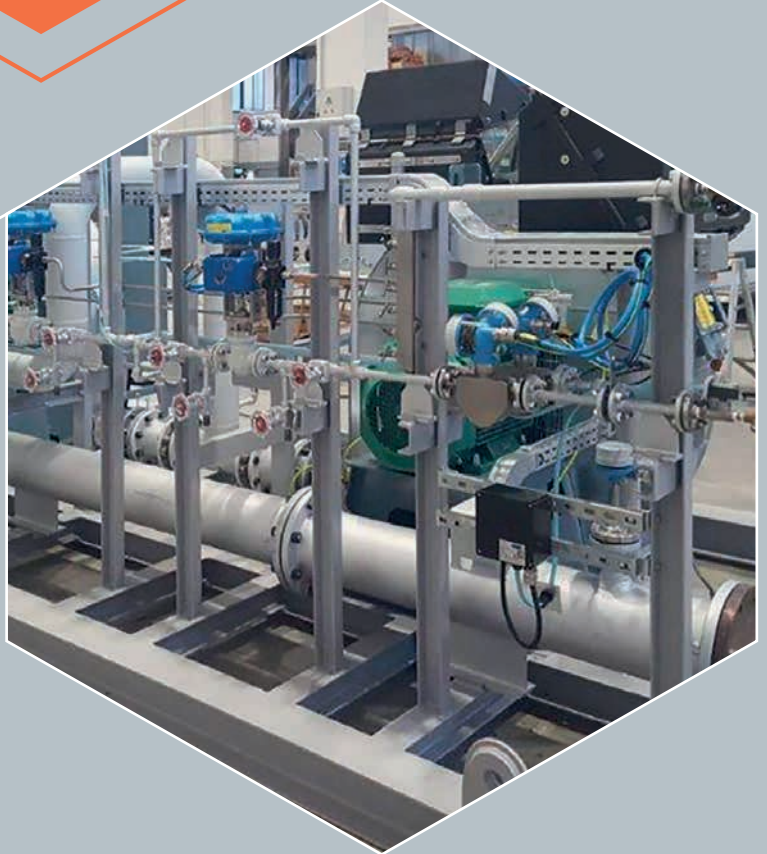

Preliminary analysis services
as feasibility studies, bid
documents predisposition,
productivity processes analysis
and control philosophies, process
review for production optimization
and energy saving, equipment size
calculation, control process, safety
and, in general, all those activities
that allow to define the initial
phases of project development.

Procurement activities,
like suppliers selection, RFQ
redaction, economical and
technical bid evaluation,
commercial negotiations, third
parties and direct purchases of
equipment, tools and materials.

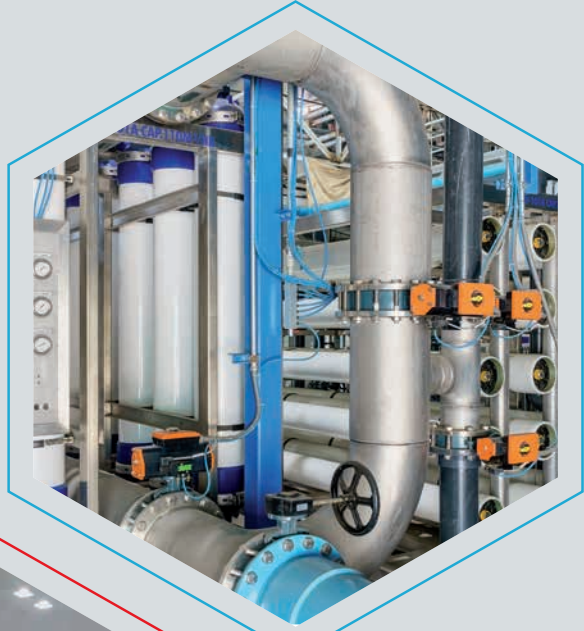

Technical Services
support and post-sale, like project
management activities, electrical
and instrumental mounting, tests
by clients and/or suppliers, work
direction activities, follow-up
installation, commissioning, start
up and training.

ENGINEERING AND SPECIAL PROCESS PACKAGES

Multidisciplinary approach in the field of chemical and petrochemical; oil&gas and power sectors production processes; development and construction of industrial plants together with basic and detailed engineering disciplines; supplying of packages mounted skid: are part of our strenght.

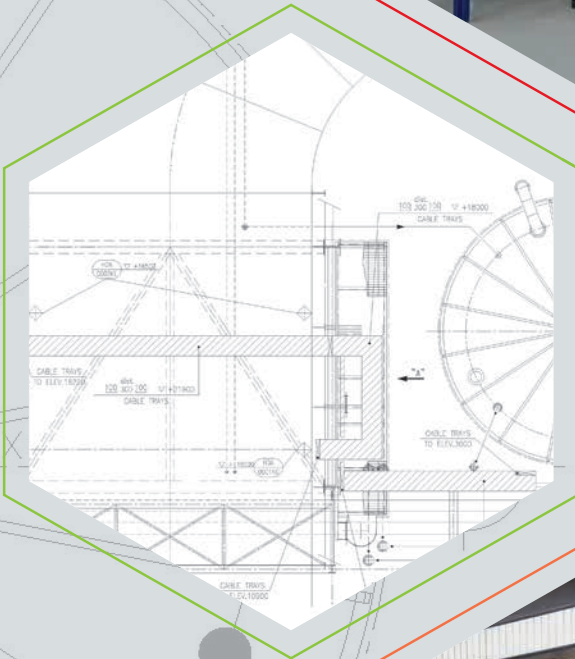

DISCIPLINARY SKILLS

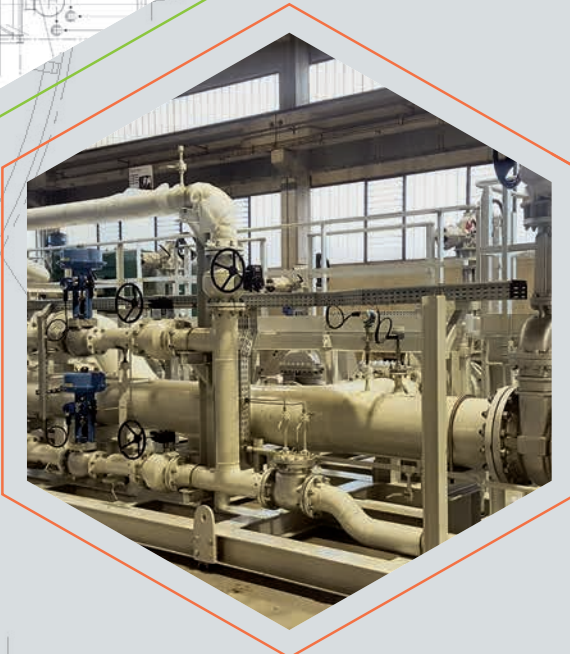

**Automation
& Control System
and Electrical
Distribution Division**
Over 30 years of
experience supplying
products to EPC and
END USERS.

Water Division
Extensive
experience in the
fields of Water
and Wastewater
Treatment in
all industrial
applications.

Engineering Division
Composed of highly skilled
professionals who are constantly
updated on new technological
releases, ensuring quality
engineering products and
solutions.

**Special Process
Packages Division**
Focused on design
and construction of
Skid Mounted Systems
or Packages, Turn-key
plants as well as Process
Engineering Services.
